

# 3Quotes POC Development Quotation

**Project Name:** 3Quotes Proof of Concept (POC)

**Objective:** Rapid development of a functional prototype to demonstrate core value to stakeholders.

**Timeline:** 14 Days (2 Weeks)

**Date:** December 15, 2025

---

## 1. Executive Summary

This proposal outlines a condensed **14-day sprint** to build a functional "Show & Tell" version of the 3Quotes platform. Unlike the full MVP, this Phase focuses exclusively on the "Happy Path" user experience—allowing a user to land on the site, chat with the AI to define their needs, and immediately download a professional Bill of Quantities (BOQ) PDF.

**Primary Goal:** To provide a tangible, working application that the team can use to visualize the workflow and pitch the concept to investors or internal stakeholders.

---

## 2. Revised Technology Stack (Lightweight)

- **Frontend:** React with TypeScript (Retained for high-quality UI)
  - **Backend:** Python (FastAPI) or Node.js (Express)
  - **AI Engine:** OpenAI GPT-4o-mini (Direct Integration)
  - **Database:** SQLite or JSON Store
  - **PDF Engine:** Python WeasyPrint or PDFKit (For instant BOQ generation).
- 

## 3. Scope of Work & Deliverables

### A. UI + Design: Landing & Categories

- **Landing Page:** High-impact visual design showcasing the value proposition
- **Service Category Grid:** Visual selection for the 13 service categories (e.g., Painting, Cleaning, Moving)
- **No Authentication Barrier:** Users can click a category and start immediately ("Try Before Signup" logic)

## B. AI Chatbot Integration

- **Interactive Chat Interface:** A clean, WhatsApp-style chat UI built in React.
- **Contextual AI:** The bot will act as a domain expert (e.g., if "Painting" is selected, it asks about square footage and paint type).
- **Requirement Gathering:** The AI will ask 3-5 dynamic questions to understand the scope of work

## C. BOQ Generation + PDF Export

- **Structured Data Extraction:** The system converts the chat conversation into a structured list of items (e.g., "20 Liters Paint," "3 Days Labor").
  - **Instant Quote Generation:** A "Generate Quote" button creates a professional PDF.
  - **Visual Output:** The PDF will include the 3Quotes branding, project summary, and an *estimated* price range (using dummy/market-average data for the demo).
- 

## 4. Exclusions (Deferred to MVP Phase)

To strictly meet the 14-day deadline, the following items from the original quotation are removed:

- **User/Vendor Registration & Login:**
  - **ERPNext Installation**
  - **Real Vendor Matching:** (We will simulate matches).
  - **SMS/Email Integration:** PDF download is sufficient
- 

## 5. Commercials

- **Timeline:** 14 Days
  - **Resource Allocation:** 1 Full-Stack Developer + 1 UI/UX Designer
  - **Deliverable:** A live web link (URL) + Source Code.
-
